

EquiForce Ventilator+

Dual-acting formula

EquiForce Ventilator+ is a refreshing supplement with a multiple blend of essential oils (eucalyptus, peppermint, anise, and rosemary), Echinacea purpurea (red sun hat) and honey.

The formula is dual-acting: it soothes and relieves the airways which provides the horse with maximum air but also supports

the immune system in a natural way.

Suitable for all horses (with respiratory problems) regardless of the level of exertion.

But certainly ideal for sport horses that must be well ventilated to sustain optimum performances and at the same time need to maintain a well-functioning immune system, regardless of travelling, changing environments, stress, exposure to airborne irritants (dust, fungal spores, ammonia, etc.).

DAILY DOSE (*shake well before use*):

Horses: 2 x 20 ml

Ponies: 2 x 15 ml

Maintenance/prevention: half dose

PACKAGING:

1 liter
