1 COMPANY 55 COUNTRIES

Watermill Left: 1845, Right: Today

FAMILY-OWNED COMPANY

In 1845 was the start of today's HAVENS-company, when Mr. Godfried Kaanen (ancestor of current directors) bought the Vierlingsbeek watermill, in the South-East of the Netherlands.

THE MAAS

In 1923 the company moved to the neighbouring town Maashees, after the river Maas was kanalised. Due to this ideal location, the required cereals and raw materials can be supplied by ship from France, Germany or other parts of the world (through the harbour of Rotterdam).

OLYMPIC QUALITY

One can say with certainty that HAVENS Horsefeed has proven itself in practice. HAVENS customers have won numerous medals at many international championships and competitions.

GUARANTEE

Our feed is extensively tested on a regular basis for various (FEI) championships and competitions. The high quality of the raw materials, the large diversity of the ingredients, the innovative production facilities and the consistent recipes, make a bag of HAVENS Horsefeed really stand out from other brands.

JEROEN DUBBELDAM, OLYMPIC CHAMPION IN 2000, DOUBLE WORLD CHAMPION IN 2014 AND DOUBLE EUROPEAN CHAMPION IN 2015

CERTIFIED PRODUCTION

Composing feed is our expertise. While doing this, we are striving for the highest possible quality. All incoming ingredients, the complete production process and the delivery of products are subject to strict rules, to ensure safe feed of a qualitative high standard.

PREMIUM FEED

1958: launch of the DraversBrok® performance cubes. Ever since, HAVENS has been continuously developing and improving its feed products. Today, we proudly present a complete and versatile range of cubes, mixes and mueslis. These products are available in more than 55 countries worldwide.

PROBLEM SOLVER

OAT-FREE

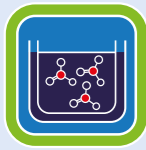

CONTAINS
Gastro+
to support a healthy stomach

Gastro+

Gastro+ is an unique product with special additives to support a good stomach function. It is an fully balanced feed (7mm cube) with a very high dosage of vitamins, trace elements and amino acids, which makes Gastro+ an ideal feed for equine athletes.

FEATURES

Supports healthy stomach function

Gastro+ is a 7mm pellet with unique properties. Blended with a special cocktail of sodium bicarbonate, calcium carbonate, magnesium and additional probiotics to sooth the stomach and support a normal pH-value. This helps to regenerate the stomach lining.

Improved performance

Gastro+ is a nutritionally complete feed with a high content of amino acids, vitamins (e.g. 400mg Vit.E), and trace elements; providing your (sport)horse with all nutrients it needs.

Optimal digestive health

Oat-free and contains a low starch formula. A high content of alfalfa promotes the chewing and saliva production. Alfalfa and saliva are both proven to buffer acidity in the digestive tract.

Anti-inflammatory effect

Extra oil is included with an optimal omega-6 to omega-3 fatty acid ratio that support anti-inflammatory effects. Also, it provides slow releasing energy to support optimal performance.

Scan to watch our Gastro+ video!

SYMPTOMS OF DIGESTIVE PROBLEMS

An estimated 60% of sport horses and over 90% of race horses have some degree of gastric ulcers. These horses often suffer from inexplicable complaints:

- Regularly recurring colic
- Frequently cribbing, teeth grinding or yawning
- Loss of healthy appetite
- Decreased performance
- Lack of energy and passive attitude
- Poor coat condition
- Weight loss
- Bloated stomach
- Soft or sour-smelling manure

Developed in collaboration with Equine Clinic Venlo, the Netherlands

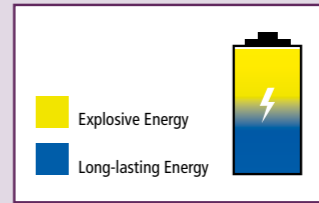

Performance 14

Special muesli with a unique combination of long-lasting and explosive energy to support both aerobic and anaerobic respiration. Additionally, it contains extra high-quality proteins and amino acids for muscle building, and Gastro+ to support a healthy stomach.

FEATURES

Performance 14 uses a unique combination of highly palatable slow and fast releasing energy sources to support high performance horses. The formula meets the requirements of anaerobic respiration and therefore provides instant energy to support power and speed. The extra oils and fibres enhance the stamina and a prolonged performance.

The high content of toasted soybeans is a source of proteins and essential amino acids, promoting muscle development and repair. For extra muscle support a high vitamin E level is added to support the discharge of lactic acid and keeps the muscles more elastic.

Performance 14 contains banana flakes and extra electrolytes to maintain fluid balance, muscle contraction and neural activity. It is very important to replenish minerals that are flushed out through sweat in order to achieve high performance goals.

The added dried garlic supports the homeostasis and constant vital functions. Furthermore, garlic - rich in selenium and sulphur - supports the immune system and acts as a vital antioxidant with depurative effects on the blood.

Performance 14 contains Gastro+ which is blended with a special cocktail of sodium bicarbonate, calcium carbonate, magnesium and additional probiotics to support the maintenance of normal acidity in the stomach. This supports a normal stomach function and helps to regenerate the stomach lining.

PROVEN IN PRACTICE !

FEED FOR CONDITION AND PERFORMANCE

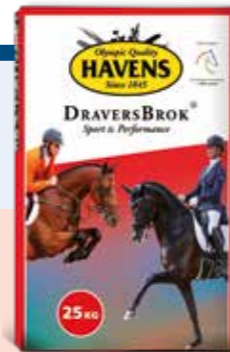

OAT-FREE

BASIS-SPORTBROK® CONDITION CUBES

A popular allround-pellet (7mm) for horses and ponies in rest or light to medium work.

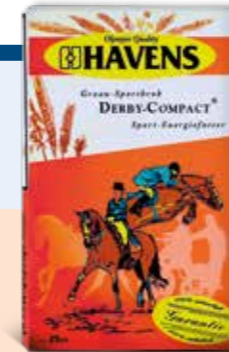

- Contains all essential vitamins, minerals and trace-elements
- Excellent price-quality ratio
- Oat-free; non-heating
- Extra oil for coat condition

DRAIVERSBROK® NO 1 BESTSELLER PERFORMANCE CUBES

No. 1 bestselling sport- and performance cube for all types of horses and ponies in medium to heavy work.

- Fully balanced and composed of natural and exclusive ingredients
- Superb protein quality to support muscle tone development and top line
- Promotes perfect vitality and optimal hoof and skin condition
- Also ideal for young, developing horses

DERBY-COMPACTBROK® PERFORMANCE

Premium concentrated energy sportcubes for top performance and intense training. A cereal based recipe, which supports an increased muscle metabolism.

- Highly digestible; high-quality proteins
- With special natural yeast for an optimal digestion
- High in vitamins, especially Vit. -B and -E
- Supports strong and elastic muscles

CONTAINS
Gastro+

ENDURANCE 14 LONG-LASTING ENERGY

A premium power and protein muesli especially for horses in long distance performance.

- Concentrated energy sources (starch, oil, fibre) for a long-lasting and constant supply of energy
- High quality proteins (14%), essential amino acids and vitamin E for muscle development
- Contains extra electrolytes to replenish mineral reserves
- With garlic to support homeostasis and immune system
- Contains approx. 30% Gastro+; to support a healthy stomach function

OAT-FREE

COOL-MIX MUESLI WITHOUT OATS

Complete non-heating mix with extra alfalfa and spelt wheat for all horses or nervous or sensitive horses.

- Low energy; slow-releasing for better control
- With easy digestible fibres, low sugar content and a high level of natural betacarotene
- High levels of minerals, vitamins and trace elements
- Also ideal for sensitive or hot-tempered sporthorses
- Oat-free
- As an 'extra' for broodmares

SPORT-MUESLI ALL-ROUND

An all-round horse muesli for sport and performance with corn and barley flakes, black oats and alfalfa.

- Highly digestible and high in energy
- High-quality proteins
- Ensures perfect condition and vitality
- Quickly restores the horse's energy after heavy training

POWER-PLUS MIX MUSCLE FITNESS

Concentrated premium cereal mix with black oats, micronised maize and barley for horses in high exercise. Ensures extra power and strong and elastic muscles without fattening.

- Superb protein quality to support muscle tone development and top line
- High vitamin levels (e.g. Vit. A., B., E., Biotine)
- Contains extra electrolytes (ideal for intense training or in hot climates)

KENTUCKY LITE E GLYCOGEN-LOADING

Kentucky Lite E is an energy mix, with black oats, special high-performance vitamin cubes and soy-bean oil, for horses in high exercise.

- Permits optimal loading and storage of the glycogen reserves
- High energy level from carbohydrates and starch
- High Vit.E; improves muscle condition

COMPLETE FEEDS

"THE GREEN VET" HERBAL MUESLI

A natural muesli based on hydrothermally opened cereals (including barley, wheat, corn, oats), carrot flakes, carob and alfalfa, additionally supplemented with natural herbs and essential oils.

The aromatic smelling Green Vet contains a luxurious herbal blend of eucalyptus, peppermint, thyme, marjoram and basil.

- Low protein content
- Contains hydrothermally opened cereals for optimum digestibility
- Varied and extremely tasty composition
- Contains high levels of all necessary vitamins, minerals and trace elements to support natural resistance and health
- Dust free and with extra herbs; beneficial for the respiratory tract

**MOLASSES-FREE
OAT-FREE**

NATURAL BALANCE LOW SUGAR FIBRE BLEND

A unique healthy and oat-free muesli with a coarse composition and without added sugar or molasses.

- Free of molasses and no added sugar. Highly suitable for native breeds and horses in a feeding regime with focus on low sugar intake
- Optimal omega 3/6 ratio for an improved fertility, stamina, hoof quality, skin, fur, and ability to perform
- High fiber level for a high saliva production, which supports a normal pH-value in the stomach and a healthy digestive tract
- Spelt wheat with natural glucosamine for flexible and vital joints
- Contains garlic; very suitable for horses that are troubled by insects, horseflies and flies
- Completely oat-free and therefore ideal for sensitive or hot-tempered horses
- Ideal for seniors who can still chew properly

OAT-FREE

SLOBBER-MASH THE ORIGINAL

Oat-free mash with lots of bran, flaked cereals, corn, toasted linseed and completed with extra vitamins and minerals.

- Highly palatable and easily digestible
- For extra shiny coat condition; ideal during moulting
- Supports a healthy bowel movement
- Ideal for (old) horses with chewing problems or horses in poor condition
- Can be fed as well as dry or soaked with water

SENIOR FEEDS

GRAIN-FREE

Senior Crumbs LIFETIME VITALITY FORMULA

Feeding and caring for an ageing horse poses quite a few challenges. The general physical condition is slowly deteriorating.

Their overall physical condition deteriorates slowly over time. Sooner or later, you will see weight loss, muscle loss, a duller coat, and difficult shedding. Poor digestion and inefficient absorption of nutrients due to dental problems are also common.

In brief, their energy and nutritional requirements change and they require much more from their ration. Our new Senior Crumbs is a small pelleted feed (crumble), designed to meet the nutritional needs of horses in their golden years.

It is grain-free, rich in vitamins and helps to maintain good health while the aging horse faces difficulties in chewing and/or a loss of physical condition. It is also suitable for (young) horses who need to gain weight.

Scan to watch our Senior Crumbs video!

UNIQUE FEATURES!

GRAIN-FREE FORMULA

Highly digestible, rich in fibers and ideal for all horses that benefit from a grain-free diet.

Contains extra omega 3 and 6 fatty acids for a positive effect on the immune system and the coat, and to maintain suppleness and mobility.

Small pelleted feed (crumble) designed to soak to form a mash: easy intake and ready to feed within just 2 minutes!

Balanced levels of vitamins and minerals for optimal health and vitality. With extra B-vitamins and Vit.C.

A low starch and sugar content and high digestibility. Suitable for horses of all ages that require a diet of reduced starch and sugar.

High quality proteins (12.9%) to support muscle quality and maintain body weight.

TIP

We recommend to combine Senior Crumbs with soaked HAVENS Fibre Dice if the horse struggles with eating traditional roughage. This ensures an intake of extra fibres.

More information on this product can be found on page 13. ➤

FEED FOR MARES AND FOALS

FERTO-LAC 3 (7 MM) SPECIAL BROODMARE CUBES

- With Multi-Calcium-Complex, extra copper and additional amino acids to aid in proper bone growth and promote a balanced development of the foal
- Increased energy and protein level to support an optimal milk production
- Meets the specific nutrient requirements of mares during last trimester of pregnancy and lactation until weaning
- Also suitable for breeding stallions

OPTI-GROW (5 MM) FOALSTARTER

- Enriched with high-quality protein and milk powder
- The Multi-Calcium Complex and the additional amino acids support a balanced development of the foal's skeleton and muscle mass
- The high palatability and the reduced diameter (5 mm) ensure an easy intake at a young age
- Supports an optimal growth during the first 18 months of a foal's life. Thereafter we recommend feeding DraversBrok

NO SALE WITHOUT X-RAYS

The breeding of foals is an expensive business. Mare, stud fee, feed and care, together the costs can amount to large amounts of money. That is exactly why you should not take any risk with the feed of the unborn foal, as during gestation your mare is laying the basis for OCD-free x-rays of the foal!

FEEDING "THROUGH THE UMBILICAL CORD"

Specific nutrients such as copper cannot be supplied to the foal through the milk but can only be provided through the umbilical cord. HAVENS Ferto-LAC 3 with MCC (Multi-Calcium-Complex) was especially developed to meet the specific nutritional needs of the mare. It is a special cube for gestating and lactating mares with an additional calcium- and copper-complex and extra vitamins (Vit. A, E, Folic Acid etc.) for an optimal intake by the (unborn) foal.

ROUGHAGE

TIP

Ideal as a reward, during transportation or during competitions

MIX

MIX is a high quality chaff of timothy grass, alfalfa and a blend of linseed products. MIX can be perfectly used to **upgrade your horse's diet** (proteins, amino acids) and to increase the eating time (mixed with concentrate feed). The high fibre content promotes chewing which helps saliva production, an important part of the digestive health. A well chewing horse is a happy horse.

- Free of molasses, grains and grain byproducts
- Source of high quality lucerneproteins (14%) and amino acids
- Optimized ca/ph ratio
- Low sugar (7.0%) and starch (2.4%) content; fits in a diet low in nonstructural carbohydrates
- Linseed and linseed oil provide valuable omega acids

BRIX

BRIX consist of compressed blocks of pure alfalfa and mint. They are ideal as a treat or to **upgrade your horse's diet**. Your horse can chew on the BRIX which can help relieve boredom. The high fibre content promotes chewing, saliva production and digestive health. A HAVENS BRIX in the feeding bucket with the concentrate feed will help prevent gobbling. It works like the well known brick/stone in the feeding bucket, except BRIX is a healthy edible alternative. Dried mint has been added to tempt even the most picky eaters.

- Highly digestible proteins (16.5%) and essential amino acids
- Low sugar content of 5.7% (hay contains usually around 10% sugar)
- Free of molasses, grains and grain byproducts
- Compact and easy-to-feed
- As a treat or to relieve boredom

FIBRE DICE WITH APPLE

Sufficient roughage of good quality is a necessity for a healthy digestive system. HAVENS Fibre Dice with apple is ideal for all breeds as a healthy treat or to supplement or upgrade the roughage consumption. The very tasty chunks are composed of timothy chaff, alfalfa, dried apple bits and apple aroma.

SPECIAL CHARACTERISTICS

- Extra large chunks for maximum structure; plenty to chew on
- Constant, high quality
- Low in starch (1,5%) and sugar (5%) and without the addition of molasses or cereals
- Dried with hot air; free of dust and mold
- Very tasty; ideal for fussy feeders

EQUIFORCE

EquiForce comprises of a series of highly concentrated feed supplements composed of **100% natural ingredients** with proven results. Only the highest quality ingredients are used, like chelated trace elements,

incasulated/coated vitamins, natural flavours and antioxidants (mainly herbs and/or essential oils). All products are freeflowing, easy-dosable, palatable and well accepted by horses. See also www.horsefeed.nl.
