

EquiForce Gut Support

EquiForce Gut Support is a probiotic supplement with a live yeast strain for horses, which has a profound probiotic effect for the hindgut for horses and stabilizes the microbiome of the hindgut. A healthy gut function is crucial for the horse's health and well-being. EquiForce Gut Support prevents imbalances in the hind gut with regular use.

EquiForce Gut Support improves the growth of useful bacterial population in the horse's hindgut, by selectively promoting growth of 'good' bacteria and suppressing 'bad' bacteria. Because of the added Agrimos® harmful microorganisms gaining foothold in the horse's digestive tract is prevented. Agrimos® are complex carbohydrates which have three effects: physical blocking the receptors of the intestinal wall, binding to the surface of immune-specific intestinal cells and selective nutrition of the beneficial bacterial strains in the horse's digestive tract. In addition, the fiber digestion improves and optimizes the self-development of water-soluble vitamins (including vitamin B & C). This improves the efficiency of the food-intake, skin-, coat- and hoof condition, and reduces digestive disturbances. Furthermore, trials with breeding animals have also shown that Agrimos® significantly increases the count of antibodies in the milk. Supplementation with EquiForce Gut Support to the breeding mare from approx. one month before giving birth therefore increases the resilience of the foal already from birth.

DAILY DOSE:

Horses: 15 g (1 scoop)

Ponies: 10 g (2/3 scoop)

*Preferably this supplement **should not be soaked** before use. When fed in combination with mash, do not soak for more than 30 minutes.*

NOTE: *In case of ongoing problems, always contact your vet!*

PACKAGING:

1 kg jar (66 portions of 15 g)

3 kg jar (200 portions of 15 g)

	per kg	per 15 g
Live yeast cells	3.2×10^{12} CFU	2.0×10^{10} CFU
Agrimos®	333 g	5.0 g
Kieselgur	118 g	1.8 g
10^{10} = 10 miljard
