

EQUIFORCE Calm & Relax

Concentrated and effective remedy that calms and relaxes horses that tend to be stressed or nervous when facing certain situations or events. Administration 1-2 hours prior to a stressful event or situation, relieves anxiety and helps the horse to stay more relaxed and focused without impairing the ability to perform.

Contains high levels of tryptophan which are linked to serotonin levels that are believed to improve the horse's mood and docility. The substance serotonin reduces fear and relieves stress, which is why the substance is often referred to as a feel-good-substance. Serotonin is produced in the brain stem from the essential amino acid tryptophan.

EQUIFORCE Calm & Relax is combined with magnesium, chamomille and honey, which are all known for their calming effect. Administration of the product will take the edge of the horse's enthusiasm and anxiety.

Daily dose

Horses: 1 tube (80 g) | Ponies: $\frac{1}{2}$ - $\frac{3}{4}$ tube.

The product is intended to alleviate short-term stress and anxiety in horses. However, it is not intended to compensate stress and anxiety that relates to poor management or chronic health issues, such as ulcers or lameness. Therefore, horse owners should also consider investigating the potential causes of unwanted behaviors, especially if those behaviors have a sudden onset.

Package sizes

Tube (80 g) or box with 8 tubes.
