

NUTRITION DATASHEET

Nutrient per kg:					Extra added per kg:						
Energy	MJ	10	Essential amino acids:		Vitaminization:			Cholin-Chloride		mg	450
VEP		740	Lysin	g	12.6	Vit. A	IE	36,000	Vit. C	mg	200
Ewpa		0.7	Methionine + cysteine	g	9.1	Vit. D-3	IE	6,000			
			Threonine	g	9.9	Vit. E	mg	750	Trace elements:		
Macro-nutrients:			Tryptofan	g	3.3	Biotin	mcg	1,000	Iron (Fe)	mg	225
Starch	%	8.0				Vit. K3	mg	3	Copper (Cu)	mg	30
Sugar	%	6.6	Minerals:			Vit. B1	mg	9	Zinc (Zn)	mg	375
Crude fibre	%	15.3	Ca/P-Ratio		1.9	Vit. B2	mg	15	Manganese (Mn)	mg	165
Crude protein	%	25	Calcium (Ca)	g	13.0	Panthothenic acid	mg	29	Cobalt (Co)	mg	3.0
dig. Protein	%	20.5	Phosphorous (P)	g	6.8	Niacin	mg	60	Iodine (I)	mg	2.2
Crude fat	%	3.1	Magnesium (Mg)	g	4.5	Vit. B6	mg	7.5	Selenium (Se)	mcg	450
unsaturated	%	70	Sodium (Na)	g	7.9	Vit. B12	mcg	60	Form: pellets		
Crude ash	%	10.7	Potassium (K)	g	16.1	Folic acid	mg	10	Packaging: 20 kg		

FEEDING QUANTITY

It is important to feed a diet and quantity that matches the lifestyle and needs of the horse.

A general guideline for the recommended total amount of concentrates per day:

- For maintenance and basic sport: 0.2 to 0.5 kg per 100 kg bodyweight
- For (top) sport: 0.5 to 0.75 kg per 100 kg bodyweight

Due to various factors such as breed, body weight, age, exercise and quality roughage, etc. one can deviate from the above guidelines if needed.

GENERAL FEEDING ADVICE

- Divide the feed ration (roughage and concentrate) into several small portions a day to allow the digestive system to function optimally.
- Horses are creatures of habit and therefore need consistency in feed composition and fixed feeding times.
- Feed according to performance: the proportion of concentrate may be reduced on days with little or no training.
- Feed good roughage, that is dust-free. The recommended quantity is approx. 1.5% of body weight per day on a dry matter basis.
- Make sure the horse always has access to fresh drinking water.

RESELLERS

HAVENS Horsefeed is sold through an extensive network of HAVENS retailers in the Benelux, Europe, USA, Asia and many other countries. Check www.havens-dealers.com for your nearest point of distribution.

GIVE YOUR HORSE THE MUSCLE POWER TO PERFORM AT ITS BEST

ProtiPower 25 is a premium high-protein complementary feed developed to support muscle development, recovery, and overall vitality in horses. Thanks to its high content of essential amino acids and highly digestible proteins, ProtiPower 25 provides the key building blocks needed for strong, healthy muscles. Its concentrated formula not only supports natural muscle development but also contributes to a healthy metabolism and optimal condition.

With its reduced energy, starch, and sugar content, ProtiPower 25 is a smart choice for horses that require extra protein without unnecessary energy. This makes it suitable for a wide range of horses, from growing young horses and sporthorses in training to horses recovering from exercise. A powerful topping that enriches the daily ration with essential nutrients, without making horses overly hot-tempered or energetic.

Features

Essential amino acids

Contains a high level of essential amino acids that contribute to strong muscles and faster recovery. The highly absorbable formula supports vitality and a healthy metabolism. Perfect for horses that need that little extra.

High in vitamins and minerals

The balanced levels of vitamins and minerals support optimal health and vitality. Thanks to the high concentration, the amount of concentrate feed can remain low, while the horse still receives all essential nutrients.

High in protein

ProtiPower 25 has a high protein content of 25%, which supports the natural muscle development of horses. The easily digestible proteins provide the building blocks needed for strong, healthy muscles. Ideal for horses that need extra support during training, growth, or recovery, such as young horses or (top) sporthorses.

Low in energy

ProtiPower 25 contains a reduced energy level, making it suitable for hot-tempered or stress-sensitive horses and ponies. It is therefore the ideal protein-rich topping to add to the ration without increasing the energy level.

Low starch and sugar content

With its low starch and sugar content and high digestibility, ProtiPower 25 is suitable for horses of all ages that require a low-starch, low-sugar diet. This makes it particularly suitable for horses that are more sensitive to sugar and starch.

Testimonials

Photography: Hippo Foto Media

**Sanne de Jong,
International event-
ing rider with Enjoy:**

“ ProtiPower 25 truly lives up to its name. My horses have made impressive progress in muscle development and strength in a relatively short time. It has proven to be a valuable addition to their daily ration. I had been searching for extra nutritional support for my top horse, Enjoy, to improve her muscle strength. Since feeding ProtiPower 25, the difference has been clear—she feels stronger, more powerful, and is performing at her best. ”

**Michel Rothengatter,
winner Berlin
Trotting Derby in
2024 en 2025:**

“ After 2.5 months of testing, I'm very pleased with ProtiPower 25. My horses accepted it immediately, and it's easy to add to their daily ration. They feel noticeably looser, tire less quickly during work, and have clearly build muscle and strength.

Because it's so highly concentrated, it provides excellent nutritional support without the need for large amounts of additional concentrate feed. I would definitely recommend ProtiPower 25 for horses that need extra support with endurance, muscle development and maintenance, and recovery. ”
