Cool-Mix

PRODUCT DESCRIPTION:

The Cool-Mix is a special muesli with a high proportion of processed grains, designed for (sport) horses and ponies that become **temperamental** quickly. The muesli consists of easily digestible alfalfa protein. As the name suggests, the Cool-Mix contains a **low share of energy**. Combined with spelt, which stimulates intestinal activity and provides a calming effect, the muesli is ideal for horses and ponies that are sensitive to stress and/or prone to getting too temperamental.

The Cool-Mix meets the needs of horses and ponies that benefit from a low-energy ration combined with a high vitamin and mineral content. Therefore, it is also ideal for horses at rest due to injury, native breeds, and temperamental horses and ponies. Thanks to the high proportion of **β -Carotene** from alfalfa, Cool-Mix supports the fertility of mares outside the grazing season. If your broodmare is prone to obesity, choose Cool-Mix during the early stages of a mare's pregnancy. This is because Cool-Mix is also known as our diet muesli. It can, of course, also be used for all other horses that quickly become (too) fat.

Fits into an **oat-free** and **low-sugar** diet

Rich in **vitamins, minerals** and **fibres**

Contains easily digestible **proteins** and a high proportion of processed grains

Rich in **β -carotene** to support fertility and immunity

Ideal for **temperamental** horses and ponies or **native breeds**

Low energy content

LOW

that is released slowly

NUTRIENT/KG

Dig. Energy	11 MJ	Threonin	4.3 g	Cholin-Chloride	200 mg
		Tryptophan	1.4 g	Vit C	- g

T = Total A = Added

Packaging: **20kg** bags

Composition: **Muesli**

COMPOSITION:

Lucerne, Maize flakes, Barley flakes, Spelt, Maize heat treated, Wheat heat treated, Cane molasses, Wheat middlings, Soya bean hulls(*), Calcium carbonate, Dried (sugar) beet pulp, Maize(*), Sunflower seed meal, Sodium chloride, Magnesium oxide, Dextrose, Vegetable oil and fat (soja(*))

* = produced from genetically modified soybeans or mais.

FEEDING ADVICE:

It is important to feed a diet and quantity that meets the lifestyle and needs of the horse. A general guideline for the recommended total amount of concentrates per day:

- For maintenance and basic sport: 0.2 - 0.5kg per 100kg bodyweight
- For (top) sport: 0.5 - 0.75 kg per 100kg bodyweight
- Divide this daily ration into at least **2 - 3** meals per day.
- Always feed at least 1.5% of your horse/pony's body weight good quality based on dry matter roughage.
- Fresh drinking water must be available at all times.
