Derby-Compact

PRODUCT DESCRIPTION:

Derby-Compact is a 7mm **concentrated sport pellet** for sport horses and ponies that have to perform at an intensive level. It contains a high energy content which comes from the rich addition of **easily digestible grains**. The raw materials are grinded and heated, increasing the absorption and making it easy for a horse to release the energy. The Derby-Compact also contains an **extra yeast culture** for **optimal digestion** and the pellet supports an **increased muscle metabolism**. The Derby-Compact contains 10.7% high-quality crude protein. Combined with the right raw materials and vitaminisation, it contributes to optimal muscle mass fitness. In a roughage batch with a low amount of protein, it is advisable to feed Derby-Compact in combination with the HAVENS MIX. Derby-Compact fits well to the needs of horses that have to go to the extreme and need a lot of extra energy. Formulated to provide horses with extra strength and flexibility.

FEEDING ADVICE:

It is important to feed a diet and quantity that meets the lifestyle and needs of the horse. A general guideline for the recommended total amount of concentrates per day:

- For maintenance and basic sport: 0.2 - 0.5kg per 100kg bodyweight
 - For (top) sport: 0.5 - 0.75 kg per 100kg bodyweight
- Divide this daily ration into at least 2 - 3 meals per day.
 - Always feed at least 1.5% of your horse/pony's body weight good quality based on dry matter roughage.
 - Fresh drinking water must be available at all times.
