DraversBrok

PRODUCT DESCRIPTION:

The DraversBrok is one of the **HAVENS bestselling products!** It is a complete concentrate composed of **100% natural** and **high-quality** raw materials. With a medium share of energy it makes it suitable for many horses and ponies that need to do medium to heavy work. DraversBrok is a balanced sport and performance pellet (7mm) that makes an important contribution to performance and provides horses and ponies with sufficient energy. The DraversBrok contains **high-quality protein** to support muscle building and, as a result, the pellet also contributes to the development and maintenance of the current topline.

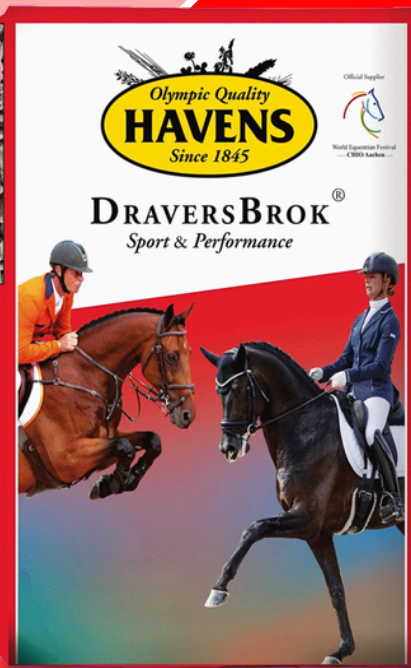

DraversBrok is also an ideal feed for **young developing horses**. From the age of 18 months onwards, it is important that horses and ponies get enough energy in combination with high-quality protein and sufficient vitamins and minerals for **balanced growth** and **muscle development**. The DraversBrok suits this need perfectly. This sport and performance pellet can be fed during the breaking in period and throughout the horse's future sports career.

- ✓ Complete **sport** and **performance** pellet
- ✓ First-class protein quality to support **muscle building** and **topline**
- ✓ Supports perfect vitality and optimal **hoof** and **skin condition**
- ✓ Ideal for young **developing** horses
- ✓ **100% natural energy** from grains, alfalfa and linseed
- ✓ **Fed by top riders:** Willem Greve, Jeroen Dubbeldam, Adelinde Cornelissen and many more...

MEDIUM

*Medium energy level
& high quality proteins!*

NUTRIENT/KG

Dig. Energy	12 MJ	Threonin	3.8 g	Cholin-Chloride	150 mg

T = Total A = Added

Packaging: 20/25kg bags

Composition: Pellets

COMPOSITION:

Wheat middlings, Soya bean hulls(*), Barley, Wheat, Maize(*), Cane molasses, Oats, Lucerne, Vinasses, Calcium carbonate, Sodium chloride, Sunflower seed meal, Vegetable oil and fat (soja(*)), Monocalcium phosphate, Vegetable oil and fat (Linseed), Maize gluten, Magnesium oxide

* = produced from genetically modified soybeans or mais.

FEEDING ADVICE:

It is important to feed a diet and quantity that meets the lifestyle and needs of the horse. A general guideline for the recommended total amount of concentrates per day:

- For maintenance and basic sport: 0.2 - 0.5kg per 100kg bodyweight
- For (top) sport: 0.5 - 0.75 kg per 100kg bodyweight
- Divide this daily ration into at least 2 - 3 meals per day.
- Always feed at least 1.5% of your horse/pony's body weight good quality based on dry matter roughage.
- Fresh drinking water must be available at all times
