## DraversBrok

#### PRODUCT DESCRIPTION:

The DraversBrok is one of the **HAVENS bestselling products**! It is a complete concentrate composed of **100**% **natural** and **high-quality** raw materials. With a medium share of energy it makes it suitable for many horses and ponies that need to do medium to heavy work. DraversBrok is a balanced sport and performance pellet (7mm) that makes an important contribution to performance and provides horses and ponies with sufficient energy. The DraversBrok contains **high-quality protein** to support muscle building and, as a result, the pellet also contributes to the development and maintenance of the current topline.

DraversBrok is also an ideal feed for **young developing horses**. From the age of 18 months onwards, it is important that horses and ponies get enough energy in combination with high-quality protein and sufficient vitamins and minerals for **balanced growth** and **muscle development**. The DraversBrok suits this need perfectly. This sport and performance pellet can be fed during the breaking in period and throughout the horse's future sports career.

Complete **sport** and **performance** pellet

First-class protein quality to support **muscle building** and **topline** 

Supports perfect vitality and optimal **hoof** and **skin condition** 

Ideal for young developing horses

100% natural energy from grains, alfalfa and linseed

Fed by top riders: Willem Greve, Jeroen
Dubbeldam, Adelinde Cornelissen and many more...

Packaging: 20/25kg bags

Composition: Pellets

### **COMPOSITION:**

Wheat middlings, Soya bean hulls(\*), Wheat, Maize(\*), Sunflower seed meal, Cane molasses, (Sugar) beet molasses, Barley, Lucerne, Calcium carbonate, Sodium chloride, Oats, Vegetable oil and fat (soja(\*)), Vegetable oil and fat (Linseed), Monocalcium phosphate, Magnesium oxide

\* = produced from genetically modified soybeans or mais.

It is important to feed a diet and quantity that meets the lifestyle and needs of the horse. A general guideline for the recommended total amount of concentrates per day:

- For maintenance and basic sport: 0.2 0.5kg per 100kg bodyweight
- For (top) sport: 0.5 0.75 kg per 100kg bodyweight
  - Divide this daily ration into at least 2 3 meals per day.
  - Always feed at least 1.5% of your horse/pony's body weight good quality based on dry matter roughage.
  - Fresh drinking water must be available at all times
