Gastro+

PRODUCT DESCRIPTION:

Gastro+ is a high-quality and complete concentrate feed. It contains a special soothing cocktail of sodium bicarbonate, calcium carbonate, magnesium and an **additional probiotic** to support normal acidity in the stomach. These ingredients help regenerate the stomach lining. Additionally, the optimal ratio of **omega-6** and **omega-3 fatty acids** not only aids in repairing the stomach lining but also serves as a high-quality source of slow-release energy. Moreover, Gastro+ is reduced in grains, resulting in a **lower starch content**.

For an optimal result, the best recommendation is to switch completely to Gastro+ for the first eight to 12 weeks. After this period, you can choose to replace a part (maximum 50%) with another concentrate feed of your choice. Please note: this is only an option and absolutely not necessary. Only opt for this if you want to add some energy to the ration, for example.

The Gastro+ is very high in fibre but still often fed in combination with the **HAVENS MIX**. This helps horses chew more thoroughly and produce extra saliva. Our preference is always to feed as much fibre as possible in the ration to optimally support the digestive system. Prefer feeding a muesli? Then take a look at the **Endurance 14** or the **Performance 14**. Both products contain approx. 30% of Gastro+.

Contains a special cocktail of acid buffers to support normal acidity

High alfalfa content that promotes saliva production

A **complete concentrate feed** with a high content of amino acids, vitamins (including Vit.C) and trace elements

Contains **extra oil** with an optimal ratio of omega-6 to omega-3 fatty acids

Rich in fibre & extra oil

for an optimal stomach function!

Packaging: **20kg** bags

Composition: **Pellets**

COMPOSITION:

Wheat middlings, Lucerne(15%), Sunflower seed meal, Soya bean hulls(*), Oat hulls, Cane molasses, Maize(*), Soya beans, extruded, Vegetable oil and fat (soja*), Maize heat treated, Calcium carbonate, Sodium chloride, Sodiumbicarbonate(0,5%), Vegetable oil and fat (palm), Vegetable oil and fat (Linseed)(0,3%), Magnesium oxide(0,15%), Monocalcium phosphate, Fatty acid distillates from physical refining(palm)

* = produced from genetically modified soybeans or mais.

FEEDING ADVICE:

It is important to feed a diet and quantity that meets the lifestyle and needs of the horse. A general guideline for the recommended total amount of concentrates per day:

- For maintenance and basic sport: 0.2 - 0.5kg per 100kg bodyweight
 - For (top) sport: 0.5 - 0.75 kg per 100kg bodyweight
- Divide this daily ration into at least 2 - 3 meals per day.
 - Always feed at least 1.5% of your horse/pony's body weight good quality based on dry matter roughage.
 - Fresh drinking water must be available at all times.
