POWER-Plus Mix

PRODUCT DESCRIPTION:

The name gives it away; the POWER-Plus Mix has been specially developed for horses that can use some extra power. This concentrated **premium muesli** is designed for top performance in both **power** and **endurance sports**. It is a great solution for horses that may become a bit more explosive during exercise. The POWER-Plus Mix provides plenty of energy thanks to the rich addition of easily digestible grains, which have undergone special treatment for optimal digestion in the small intestine. It is precisely the energy released from the digestion of grains that is quickly available to horses and allows them to perform optimally. The POWER-Plus Mix is very palatable and is well taken in by horses. It is a full-strength feed but is also favored as a post-exercise supplement, providing an extra boost for optimal recovery after exercise.

The muesli contains **extra added electrolytes** and is therefore suitable for horses that sweat intensively and benefit from extra electrolytes for optimal recovery of fluid balance. The Power-Plus Mix contains high-quality proteins and promotes lean muscle mass.

- ✓ **High-quality protein** for muscle development and topline
- ✓ Muesli with a **high share of energy** to give horses extra support during intensive training sessions
- ✓ Extra added **electrolytes**; ideal during heavy transpiration and warm temperatures
- ✓ With a rich addition of **vitamins, minerals** and **trace elements**, it makes a full-fledged concentrate feed
- ✓ With black oats, corn and barley flakes

High energy level

& extra electrolyten!

Packaging: **20kg** bags

Composition: **Muesli**

COMPOSITION:

Barley flakes, Maize flakes, Oats, Wheat middlings, Barley, Cane molasses, Maize heat treated, Maize(*), Sunflower seed meal, Soya bean hulls(*), Soya meal(*), Calcium carbonate, Maize gluten, Lucerne, Dried (sugar) beet pulp, Sodium chloride, Soya (bean) protein concentrate, Monocalcium phosphate, Dextrose, Vegetable oil and fat (soja(*)), Magnesium oxide, Sucrose, Potato protein

* = produced from genetically modified soybeans or mais.

FEEDING ADVICE:

It is important to feed a diet and quantity that meets the lifestyle and needs of the horse. A general guideline for the recommended total amount of concentrates per day:

- For maintenance and basic sport: 0.2 - 0.5kg per 100kg bodyweight
 - For (top) sport: 0.5 - 0.75 kg per 100kg bodyweight
- Divide this daily ration into at least 2 - 3 meals per day.
 - Always feed at least 1.5% of your horse/pony's body weight good quality based on dry matter roughage.
 - Fresh drinking water must be available at all times.
