Senior Crumbs

PRODUCT DESCRIPTION:

Feeding and caring for an ageing horse can present quite a few challenges. The overall physical condition slowly deteriorates. Sooner or later, you will notice weight loss, muscle loss, a less attractive coat, a duller coat, and more difficulty shedding. Poorer digestion of food and less efficient absorption of nutrients due to dental problems are also common.

Our **Senior Crumbs** cater to the changing energy and nutritional requirements of the aging horse. They are small pellets (crumbs) that need to be soaked in water for 2 minutes. It is **grain-free**, rich in vitamins and minerals and helps to maintain good health while the ageing horse has problems with chewing and/or a loss of physical condition. In short: Senior Crumbs is perfectly tailored to the needs of horses in their old age.

Grain-free formula, easily digestible and high in fibre

Small pellet (crumb) to soak in: easy to absorb and ready to feed within **2 minutes!**

Low **starch** and **sugar content**, suitable for horses and ponies of all ages that benefit from a ration that is low in sugars

Contains additional **omega-3** and **omega-6 fatty acids** for a positive effect on immunity and coat, and to maintain a supple locomotor system

Balanced vitamin and mineral contents for **optimal health** and vitality

High-quality protein (12.9%) to support muscle quality and maintain body weight

Packaging: **17.5kg** bags

Composition: **Pellet**

COMPOSITION:

Soya bean hulls(*), Wheat middlings, Oat hulls, Lucerne, Soya beans, extruded, Vegetable oil and fat (soja(*)), Vinasses, Cane molasses, Calcium carbonate, Sunflower seed meal, Monocalcium phosphate, Sodiumbicarbonate, Sodium chloride, Magnesium oxide

* = produced from genetically modified soybeans or mais.

FEEDING ADVICE:

It is important to feed a diet and quantity that meets the lifestyle and needs of the horse. A general guideline for the recommended total amount of concentrates per day:

➤ For retired horses: 0.5kg per 100kg bodyweight

For horses in training: 0.5kg - 0.75kg per 100kg bodyweight

- Divide this daily ration into at least 2 - 3 meals per day.
- Always feed at least 1.5% of your horse/pony's body weight good quality based on dry matter roughage.
- Fresh drinking water must be available at all times.
- The Senior Crumbs must be soaked with water. Ratio is 1 part water to 1 part Senior crumbs (1:1). Waiting time is at least 2 minutes.

TIP

We recommend combining Senior Crumbs with soaked **HAVENS Fiber Dice** if the horse struggles with hay/traditional roughage. This way it gets extra **high-quality fibre**.

- Extremely tasty large chunks of Timothy hay, alfalfa and dried apple pieces.
- Low starch and sugar content and with no added molasses, vitamins or grains.
- Hot air-dried; free of dust and mould.
- Ideal for difficult eaters.
- Soak in with water (1:2). Soak for 15-20 min.
