Slobber-Mash

PRODUCT DESCRIPTION:

Our **very tasty** Slobber-Mash is highly recommended, especially for horses that need to develop more body. The Slobber-Mash contains an increased proportion of corn (pulped corn and corn flakes), which have undergone heat treatment to optimize digestibility in the small intestine. The combination of corn starch, vitamins B and E, and added trace elements contributes to optimal muscle formation and development. Additionally, Slobber-Mash is ideal for periods when the horse needs extra support, such as during **shedding**. The mash is also enriched with **linoleic acid, linseed oil, and sunflower seeds**, and it is often fed as a delicious treat after riding. It is perfect for replenishing lost vitamins and minerals immediately."

An **oat-free** formula was deliberately chosen to ensure that the Mash is suitable for a wide range of horses and ponies. Slobber-Mash is a complete concentrate but can be supplemented with another (energy-rich) concentrate for an optimal energy balance if desired. It is highly palatable and can be fed either **wet** or **dry**. Adding water does not require an obligatory soaking time, making it easy to provide additional feed. When soaked, Slobber-Mash is very easy to absorb, making it suitable for (older) horses with chewing difficulties.

- ✓ **Oat-free** formula rich in vitamins
- ✓ Easily absorbable and **easily digestible**, promotes good intestinal passage
- ✓ For extra shine and **condition**
- ✓ Ideal for (old) horses with **chewing problems** or animals in poor condition
- ✓ Can be fed both **wet** as well as **dry** to horses and ponies
- ✓ High absorbability, very palatable!

Moderate energy level
& extra vitamins
and minerals!

NUTRIENT/KG

T = Total A = Added

Packaging: 20kg bags

Composition: Muesli

COMPOSITION:

Barley flakes, Wheat middlings, Maize flakes, Soya bean hulls(*), Maize(*), Cane molasses, Dried (sugar) beet pulp, Wheat heat treated, Lucerne, Calcium carbonate, Barley, Sunflower seed, Vegetable oil and fat (Linseed), Maize heat treated, Sodium chloride, Sunflower seed meal, Monocalcium phosphate, Vegetable oil and fat (soja(*)), Dextrose, Magnesium oxide, Fatty acid distillates from physical refining(palm)

* = produced from genetically modified soybeans or mais.

FEEDING ADVICE:

It is important to feed a diet and quantity that meets the lifestyle and needs of the horse. A general guideline for the recommended total amount of concentrates per day:

- For maintenance and basic sport: 0.2 - 0.5kg per 100kg bodyweight
- For (top) sport: 0.5 - 0.75 kg per 100kg bodyweight
- Recommendation: ratio of Slobber-Mash to water 1:1.
- Slobber-Mash may also be fed dry.
- Divide this daily ration into at least 2-3 portions per day.
- Always feed at least 1.5% of the body weight of your horse/pony good quality roughage on a dry matter basis.
- Sufficient fresh drinking water should always be available.
